Plastic, Vinyl & Rubber Components for Heavy Equipment/Off-Highway

75+ years
of industry expertise

500 million
parts in stock

32 million
parts produced
per day

50,000+
catalog products

375+
molding machines

13
manufacturing
facilities

3
domestic facilities

The 1 partner
you need

Trust the Leader

Caplugs has the **largest offering of plastic and rubber product protection** for heavy equipment in the industry. If one of our 50,000+ different standard parts doesn't meet your needs, we can create a custom solution. We offer full, in-house, custom plastic molding from design through production to meet any unique specifications.

Our 13 global facilities include **three domestic manufacturing locations** to ensure we support our customers with the parts they need when and where they need them.

Reliable Supplier to OEMs. Tier Suppliers Across the Industry.

Caplugs has experience serving nearly all of the top OEM and components suppliers of Heavy Equipment/ Off-Highway in the agriculture, construction, mining and forestry industries.

Safeguard Equipment & Minimize Downtime for:

- Engines & transmissions
- Hydraulics & pneumatics
- Electrical & HVAC systems
- Wheels & cabins

Manufacturing Processes

- Injection Molding
- Vinyl Dip Molding
- Rubber Molding
- Extrusion
- Die-Cutting
- Vinyl Coating

End-to-End Protection for Heavy Equipment

Our products are used in all phases of production and operation. They protect components throughout shipping, assembly at plants and the powder coating process. Finishing parts stay on equipment to offer added protection during in-field use.

Protection, Masking and Finishing Parts

Caplugs components help prevent damage and contamination during:

Shipping/Transit/Storage

- Machined surfaces covers
- Open ports from FOD
- Shield threads from impact

At Assembly Plants

- Sheet metal holes
- Access panel holes
- Open-tube end plugs
- Masking solutions

In-Field/In-Service Equipment

- Hydraulic hose protection
- MRO needs

Common Applications:

Secure and protect your components across nearly all systems on heavy equipment.

Electrical

- Sensor covers
- Connector caps
- Wire harnesses

Finishing Parts

- Tube end plugs
- Sheet metal plugs
- Custom rubber molded components

Hose Protection

- Spiral hose wrap
- Abrasion/burst containment sleeve
- Hose bundling
- Hose fitting
- Hose & tube assembly

Hydraulic

- Hydraulic fittings
- Manifold ports
- Fluid lines
- Pumps
- Valves
- SAE flanges

Masking Solutions

- Powder coating
- E-coating
- Electroplating
- Sand blasting
- Wet paint

Rubber Components

- Grommets
- Pads & Bumpers
- Edge liners
- Anti-vibration

Shipping/Storage Metal Protection

- Rods
- Axle stubs
- Shafts
- Pipes
- SAE flanges
- Mounting faces
- Wheel hub covers

Your Single Source for Plastic, Vinyl & Rubber

Thousands of small parts to protect every aspect of big equipment

PROTECTIVE CAPS & PLUGS

The **broadest range of plastic caps and plugs** in the industry to protect components during production, shipping and storage, along with finishing parts that remain on the end product.

HOSE PROTECTION

Our hose protection line helps you **protect your investment** and reduce potential downtime. Featuring **Pig's Tail™** and **Safeplast™**, the industry's two strongest names in spiral hose wrap, sleeves, service plugs and accessories.

RUBBER MOLDED COMPONENTS

We offer custom rubber molding plus a line of catalog parts that offer **flexibility and resilience for the harshest environments**. From sealing and fluid handling to vibration and shock absorption.

MASKING PRODUCTS

The **most comprehensive range of standard masking devices and in-house custom capabilities** in the industry. From high-temperature caps and plugs to tapes and die-cuts to hooks and racks.

CUSTOM SOLUTIONS

Our **team of in-house engineers** will work one-on-one with you through every step of the process to create a custom solution **to meet your exact specifications**. We deliver the right solution, on time and on budget.
