Caplugs offers a full line of hose protection. From the industry-leading Pig's™ Tail Spiral Wrap to our anti-abrasion sleeve, Caplugs provides a hose protection solution for every application and environment. Manufactured under our stringent ISO certified quality management system, we ensure consistent, quality products.

**Comprehensive Line of Hose Guard**

**Pig's Tail™ Spiral Wrap** is manufactured from 100% virgin high density polyethylene (HDPE). It is easy to install and designed to provide heavy-duty protection for hydraulic hoses.

**Fire-Resistant Anti-Static (FRAS) Wrap** is a conductive thermoplastic compound on a polyethylene base, designed and certified for safe usage in mines and underground applications. FRAS Wrap has an extremely good balance of mechanical properties and has been tested to MSHA #IC-264/0, AS1180.10B, AS1180.13A and AS2600.

**NightGlow Spiral Wrap** developed from tough HDPE and photoluminescence not only protects your hoses and cables but also emits light, allowing for easy identification of hydraulic lines, equipment and static objects in low light or nighttime conditions. Fluorescent glow lasts up to 12 hours.

**Service Plugs** are designed to plug hoses, rigid pipes, spoon valves and ports on pumps and motors to prevent oils and chemicals from contaminating the environment and preserve costly oils and liquids inside the system during maintenance. No tools required.

**Anti-Abrasion Sleeve** is a tough textile sheath suitable for hydraulic and pneumatic applications. Provides excellent protection against extreme temperatures and abrasion.

- Highly durable
- Resistant to most solvents, oils, acids and alkalis
- MSHA Certified #IC-281
- Protects people and equipment from bursting hoses

**Electrical Guard** is a low-density polyethylene wrap designed to wrap bundles of wires to make neat looms and protect the conductors. It will accommodate a large range of diameters and allows breakouts at any point. Wrap is lightweight and flexible.

**Wrapman** is designed to wrap Pig's Tail protective spiral wrapping onto hydraulic hoses.

- Increases wrapping speeds
- Wraps hose assemblies from 1/8 to 2 in.
- Two mounting lugs (to clamp in vice)
- Easy operation; adjustable screw-in locator
